

# Flexible and easy order pick-up with StrongPoint's locker solution

Fully customizable – mix & match modules and multiple door sizes

Can be built into the wall for indoor usage or outdoor with optional roof

Fast installation – less than one day needed for on-site installation

Works as part of a Last Mile platform for flexible e-commerce delivery

Loading app – compartments opened and locked via smartphone

Automated SMS customer communications

AI-age verification – allows 24/7 pickup of age-controlled items

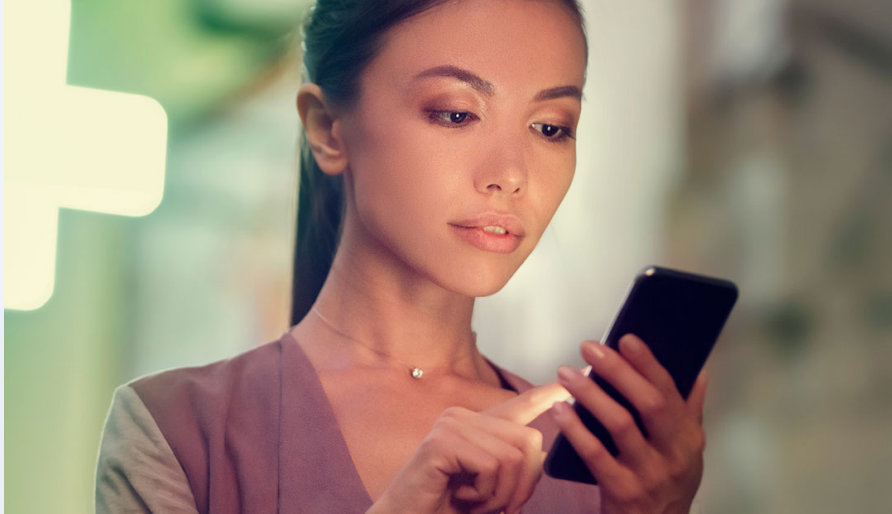

Reserve specific lockers, including reserving lower compartments

Durable, 5+ year deployments in harsh weather conditions

Remote monitoring, cloud-based and automatic alerts sent to staff

## Lockers for pharmacies and other pharmacy dispensing

StrongPoint's Locker solution provides a smooth and safe loading of pharmacy or medical items into the locker as well as a simple and safe pick up for customers.

The solution enables customers to pick up items from a convenient location 24/7 with the highest possible security for both the pharmacy and consumer.

Orders are accessed using a QR code, PIN code or via a weblink to ensure ease of use for customers.

1. Locker loading
2. Customer communication
3. Customer accesses order
4. Identification (if applicable)
5. Customer collects order

## Modular design and flexible door sizes

Modules with different door sizes are available to fit the sizes of the delivered orders and packages.

Optional add-ons:

- ✓ Payment terminal
- ✓ 2D scanner
- ✓ NFC reader
- ✓ Surveillance system

## Loading options to ensure efficiency and ease for staff and customers

### Rear Loading Option

A locker built into a wall of the storage area enables staff to prepare and load orders from the back of the locker without customer interaction.

While the locker is being loaded customers can in parallel pick up their orders at the front of the locker.
