Checkout 3 ▓▓▓▓▓▓▓▓ €493

Checkout 4 ▓▓▓▓▓▓▓▓▓ €670

Change Cash Setting

Retail Suite
CashGuard

Retail Suite CashGuard is the software for efficient and precise cash management. It gives large retailers full control with cash insights on a checkout, store or chain level. Every user gets a dashboard based on their needs and permissions.

With automated cash management, you get a streamlined and visible process, translating into decreasing costs and time savings.

Benefits

☑ Instant overview

The software tracks every payment, collection or replenishment so you can follow how the cash moves in the stores and at any time get a complete overview.

☑ Central management with store mapping

Retail Suite CashGuard is created for large re-tailers with several stores and districts. To get an overview and make the information accessible, you can create clusters of stores based on for example the district, the chain or store type.

☑ Cloud-based

You can access the software from anywhere with an internet connection. No matter if you are on the store-floor or in an aeroplane, you can always see what's going on in your store or district.

☑ Role-based

The system is role-based, where everyone from the Operation Manager to the Cashiers can access unique dashboards to the areas they need.

☑ Single Sign-on support

By connecting Retail Suite CashGuard to your HR-system, you can control the user rights based on the job title and levels directly from the HR system. You also get single sign-on where the access to Retail Suite is syncronised with the system sign-on.

☑ Customised reports

With customised reports, you can follow the trends and levels that are important for you in a format that suits you.

☑ Cash insights

The system gives you better financial control and more accurate reports. By optimising the cash levels to your needs, you can reduce the CIT and change purchase costs.

☑ User-friendly design

The interface is based on user journeys, making it fast and easy to navigate the system.

System requirements	
In-Store Platform	
RAM	Minimum 1 GB RAM
Hard drive	Minimum 1 GB available
Connection	Ethernet
Client	
Browser	Updated web browser, preferably Chrome or Firefox
